

PARKINSONIA HYBRID 'DESERT MUSEUM' Desert Museum Palo Verde

 Low to moderate water

 Full sun to part shade

 Hybrid origin

Why we love it...

Desert Museum Palo Verde is a hybrid with three parents that combines the most desirable qualities of each one. It stands out from other varieties of Palo Verde with a distinctively upright growth habit, brighter green color, thornless branches, and a longer blooming period. Its lemon yellow flowers are large for a Palo Verde, opening in late spring and continuing through the summer if supplemental water is given. Desert Museum has an airy canopy made up of long, slender leaves and tiny leaflets that cast filtered shade, allowing a variety of plants to grow under its protection. This hardy hybrid tolerates reflected heat as well as temperatures into the teens, and its trunk and branches stay green year-round, brightening dull winter landscapes.

Lydia says: Palo Verde Trees make food not only in their leaves, like other plants, but also in their trunks and branches, which is why they are green!

Semi-evergreen Tree: *Parkinsonia hybrid 'Desert Museum'*

Size (H x W): 20-25 feet x 20-25 feet

Blooms: Yellow, late spring to summer

Exposure: Full sun to part shade

Hardiness Zone: 10° F, USDA Zone 7

Water: Low to moderate

Pruning: Prune to improve form in June

Growth Rate: Moderate to fast
