

SYAGRUS ROMANZOFFIANA

Queen Palm

 Low to moderate water

 Full sun to part shade

 Native to Brazil

Why we love it...

The Queen palm is an elegant palm; graceful with its shiny, feathery green foliage that droops down, casting lovely light shade to those underneath it. Small, creamy white or yellow blossoms are produced during the warm season, and followed by little orange, edible fruits.

Because fronds can be damaged by high winds and cold weather, it is advisable to plant the Queen palm in an area where it will be protected. Plant an individual plant or a cluster of many plants near a pool or spa for a lush, tropical effect. Queen palm looks pretty planted with brightly colored shrubs like bird of paradise and lantana.

Lydia says: Apply a slow-release palm fertilizer containing micronutrients as well as magnesium and chelated iron on a monthly basis during the growing season.

Palm: *Syagrus romanzoffiana*

Size (H x W): 20-40 feet x 15-20 feet

Blooms: Cream white or yellow in spring and summer

Exposure: Full sun to part shade

Hardiness Zone: 25° F, USDA Zone 9

Water: Low to moderate

Pruning: Spring, after last frost

Growth Rate: Moderate to fast
