

# LANTANA CAMARA 'IRENE'

## Irene Lantana

 Low to moderate water

 Full sun to part shade

 Attracts butterflies

 Rabbit resistant

 Deer resistant

 Hybrid origin

### Why we love it...

Every Landscape in the southwest should have at least one of these low growing, drought tolerant beauties! They seem to be made for our arid climate, greeting the scorching desert heat with clusters of pink, magenta, and yellow flowers that butterflies find irresistible. The multi-colored clusters open with bright pink and yellow hues that darken to magenta as they age; giving 'Irene' the distinction of having some of the most vibrantly colored Lantana blooms available.

This hybrid is one of the shorter shrub Lantanas, with a spreading habit that rivals trailing varieties. 'Irene' does remarkably well in borders or containers and along curbs or walkways, where it thrives in the reflected heat that damages many less tolerant plants.

This plant is included in our Civano Select™ collection. Civano Select™ plants are handpicked by our horticulturalist for quality, form and health!

**Lydia says:** Improve the appearance of your Lantana by pruning after the last winter frost to reshape the plant and remove frost-damaged branches.

### Perennial Shrub: *Lantana camara* 'Irene'

**Size (H x W):** 1-2 feet x 3-5 feet

**Blooms:** Multi-colored pink, magenta, and yellow, spring through fall

**Exposure:** Full sun to part shade

**Hardiness Zone:** 15° F, USDA Zone 8

**Water:** Low to moderate

**Pruning:** Early spring

**Growth Rate:** Fast
