

BUDDLEIA MARRUBIFOLIA

Woolly Butterfly Bush

 Low to moderate water

 Full sun to part shade

 Attracts butterflies

 Native to N. Mexico, SW Texas

Why we love it...

As the common name suggests, Woolly Butterfly Bush is a butterfly favorite, and will have them massing around its slightly fragrant, ball-shaped clusters of flowers from March through August. This evergreen shrub is tolerant of burning sun and scorching heat, and extreme drought only intensifies the beautiful, silvery sheen of the plant's soft, fuzzy, grey-green foliage.

Very little maintenance is required to keep the shrub's dense, rounded form that provides striking contrast when used against darker, taller evergreens in the landscape. Woolly Butterfly Bush makes a lovely low border, informal hedge, or foundation plant, as well as a charming specimen when used near pools, patios and walkways.

Lydia says: Woolly Butterfly Bush goes dormant in winter, reducing its need for water. Cut back on watering through the winter and make sure your plants have adequate drainage!

This plant is included in our Civano Select™ collection. Civano Select™ plants are handpicked by our horticulturalist for quality, form and health!

Evergreen Shrub: *Buddleia marrubifolia*

Size (H x W): 4-6 feet x 4-6 feet

Blooms: Orange spheres from spring through fall

Exposure: Full sun to part shade

Hardiness Zone: 5° F, USDA Zone 7

Water: Low to moderate

Pruning: None necessary, but plant can be shaped in February

Growth Rate: Moderate to fast
