

TECOMA x 'SPARKY' PPAF

Sparky Tecoma

Why we love it...

Tecoma has long been a hot garden favorite for its blooming habits, high heat tolerance, fast growth rate, and versatility in the landscape. Developed in Phoenix by an esteemed horticulturalist and ASU professor, and named after the ASU mascot, 'Sparky' shows its school's colors with large apricot yellow blooms that have reddish-orange throats.

This designer hybrid produces few (if any) seed pods, so it looks tidy and attracts hummingbirds from spring through fall without the need for deadheading or pruning. It stays more compact than standard *Tecoma* varieties, and has an upright habit that allows it to fit into tighter spaces, or anywhere you need a splash of summer color!

Lydia says: A cold winter may freeze *Tecoma* plants to the ground, but their hardy roots will sprout new growth in spring, and you'll have flowers again by early summer.

Semi-evergreen Shrub: *Tecoma* x 'Sparky' PPAF

Size (H x W): 5-6 feet x 4-5 feet

Blooms: Yellow/Orange, spring through fall

Exposure: Full sun to part shade

Hardiness Zone: 20° F, USDA Zone 8

Water: Low to moderate

Pruning: Spring

Growth Rate: Moderate to fast
