

LEUCOPHYLLUM PRUINOSUM 'SIERRA BOUQUET'

Sierra Bouquet Fragrant Ranger

 Low to moderate water

 Full sun to part shade

 Native to Texas, Mexico

Why we love it...

Texas rangers are a large group of popular plants known for their cold tolerance, drought resistance, and their love for hot, sunny climates. 'Sierra Bouquet' is a superior selection from the most fragrant species in this group, chosen for its dense silver foliage and heavy blooming habit.

Also known as bubble gum sage, this large shrub's bell-shaped flowers are a dark royal purple, and when blooming in late summer and fall, they fill the air with the delicious aroma of grape bubble gum! With no pruning, 'Sierra Bouquet' has a rounded but open form, and it keeps more foliage in winter than some of the most popular Texas ranger cultivars; which makes it a great foundation for natural landscape designs. It tolerates heavy pruning as well, if a smaller shrub is what you desire.

This plant is included in our Civano Select™ collection. Civano Select™ plants are handpicked by our horticulturalist for quality, form and health!

Lydia says: In order to enjoy the most prolific blooming season, prune your 'Sierra Bouquet' only in early spring and allow it to grow naturally for the rest of the year!

Evergreen Shrub: *Leucophyllum pruinosum* 'Sierra Bouquet'

Size (H x W): 6-8 feet x 6-8 feet

Blooms: Purple, summer through fall

Exposure: Full sun to part shade

Hardiness Zone: 10° F, USDA Zone 7

Water: Low to moderate

Pruning: Late winter

Growth Rate: Moderate to Fast
