

LEUCOPHYLLUM FRUTESCENS

'CONVENT'

Convent Texas Ranger

 Low to moderate water

 Full sun to part shade

 Native to Texas, Mexico

Why we love it...

'Convent' has the darkest pink flowers of the cold tolerant, drought resistant, heat loving plants known as Texas Rangers. If you've ever seen one in full bloom, you have a good idea of why these are some of the most popular plants in Southwestern residential and commercial landscapes.

Though the bell-shaped, fuchsia flowers will appear sporadically from spring through fall, the most stunning floral display is brought on by the high humidity of monsoon season, when 'Convent' is ablaze with a truly unique color that sets it apart from other Texas rangers available on the market. This newer selection requires excellent drainage and stays slightly smaller than the species.

Lydia says: Texas Rangers are often seen sheared into formal shapes, but doing so will reduce the plant's ability to produce flowers. For best results, shear in spring and allow them to grow naturally for the rest of the year.

This plant is included in our Civano Select™ collection. Civano Select™ plants are handpicked by our horticulturalist for quality, form and health!

Semi-evergreen Shrub: *Leucophyllum frutescens* 'Convent'

Size (H x W): 5-6 feet x 5-6 feet

Blooms: Fuchsia, summer through fall

Exposure: Full sun to part shade

Hardiness Zone: 10° F, USDA Zone 7

Water: Low to moderate

Pruning: Spring

Growth Rate: Moderate to fast
