

APTENIA CORDIFOLIA 'MAYA'

Maya Hearts and Flowers

 Low to moderate water

 Full sun to part shade

 Native to South Africa

Why we love it...

This trailing perennial goes by many common names around the world, but we prefer to call it hearts and flowers in reference to the fleshy, heart-shaped leaves and its long, prolific flowering season. The succulent stems will root wherever they are in contact with moist soil, which makes this low growing groundcover a wonderful addition to rock gardens, slopes, and containers of any size. It works beautifully in hanging baskets as well, growing quickly with minimal watering whether placed in full sun or shade. Hearts and flowers is salt tolerant and will grow in most soil types as long as it has excellent drainage. Maya is a new selection that brightens garden spaces with scores of bright pink flowers from early spring through fall.

Lydia says: Like all succulents, maya hearts and flowers will become very slippery if it gets trampled, so it works best when located away from foot traffic.

This plant is included in our Civano Select™ collection. Civano Select™ plants are handpicked by our horticulturalist for quality, form and health!

Succulent Perennial Groundcover: *Aptenia cordifolia* 'Maya'

Size (H x W): 4-6 inches x 2-4 feet or more if moisture is available

Blooms: Pink, early spring to late summer

Exposure: Full sun to part shade

Hardiness Zone: 25° F, USDA Zone 9

Water: Low to moderate

Pruning: Winter to early spring

Growth Rate: Moderate to fast
